ENGINEERING WITH A CUSTOMER-FIRST PERSPECTIVE

I connect the business problem to the software that solves it.

I bring software development together with customer-facing finance and sales experience: clarifying needs, explaining technical fit, and building APIs and workflows around real requirements.

Areas of interest

Focus areas for applying my skills - not claims of prior delivery in every sector.

API-first SaaS | Fintech & BFSI | Automation | Data products | Cloud services | Enterprise software

Capabilities

Backend & APIs

Python, Django, Django REST Framework, JWT authentication

Data & platform

PostgreSQL, MySQL, Redis, Git, Jira

Product-facing frontend

React, JavaScript

Selected work

School Management System
WORKFLOW PLATFORM

Connected workflows for students, teachers, attendance, fees, exams, and reporting, with secure role-based access.

Django | Django REST Framework | React | PostgreSQL

Asset Management System
OPERATIONS PLATFORM

Asset tracking organized around dashboards, lifecycle status, allocation flows, and administrative controls.

Django API | React | Role-based access | Analytics

Cattle Monitoring Alerts
AUTOMATION SYSTEM

Backend-first alert system combining sensor streams, behavioral logic, health signals, and notification workflows.

Python | Redis | PostgreSQL | Scheduling

PROFESSIONAL EXPERIENCE

A career across customer conversations and code.

My path from finance and sales into software development informs how I work: understand people's needs, communicate clearly, and follow through with practical solutions.

Software Developer

A3 Services

Pune, Maharashtra
May 2023 - Present

- Built backend features with Python and Django, including REST APIs and internal tools.
- Automated recurring manual work with Python scripts, improving team productivity by 30%.
- Integrated third-party APIs with MySQL and PostgreSQL databases for client solutions.
- Worked with frontend, QA, and deployment teams using Git, Jira, and Agile practices; helped manage sprint goals and deliver on time.

Customer Relationship Executive

Shriram Finance Limited

Lucknow, Uttar Pradesh
February 2021 - May 2022

- Managed relationships with 100+ customers, supporting service satisfaction and retention.
- Handled loan verification, document collection, and commercial vehicle financing processing.
- Coordinated with credit, legal, and operations teams, resolving concerns and supporting approvals and disbursals.
- Met sales targets, cross-sold financial products, maintained CRM records, and reported customer trends.

Medical Sales Representative

Hycure Bio Genesis

Sultanpur, Uttar Pradesh
May 2016 - February 2018

- Managed B2B relationships and achieved 120%+ of quarterly sales targets.
- Presented products, negotiated contracts, and closed deals; coordinated onboarding and after-sales support.
- Maintained CRM records, prepared weekly leadership reports, and trained new team members.

> **How I work:** clarify the workflow, make technical trade-offs understandable, and build APIs and product workflows around the people and operations that depend on them.

> **Open to conversations about** software engineering, technical sales, solutions engineering, and customer-facing product roles.
